The Fund

Introduction

Senfin Money Market Fund is an Open-ended Unit Trust that invests in fixed income securities with maturities up to 12 months.

Investment Objectives

The objectives of the Fund are to provide investors with short term returns as well as liquidity by investing in a portfolio of diversified fixed income securities with tenors of 12 months or less.

Risk Profile of the Fund

Given the underlying investment mix of Gilt edge and corporate securities with tenors up to 12 months, the risk profile of the Fund is low.

Investment Strategies

In keeping with the investment objectives of liquidity and regular income, the Fund will invest in a well-diversified portfolio of short-term Government securities, bank deposits and finance company deposits. In order to enhance returns to the investor the Fund will also invest in a diversified pool of short-term corporate debt securities. The Fund Manager will engage in continuous monitoring of companies in order to ascertain their credit quality and ability to meet its credit obligations.

The Fund Manager will rely on strong local knowledge and experience in the Sri Lankan fixed income markets to ascertain interest rate expectations and movements.

A fund compliance officer will monitor the investment activities of the Fund in order to ensure that investments in the Fund comply with the rules and regulations prescribed by the SEC.

Permitted Investments

- Treasury securities: gilt edge securities issued by the Government of Sri Lanka with tenors up to 12 months including Repurchase Agreement;
- Term deposits: term deposits with a tenor of 12 months or less issued by bank and non-bank entities;
- Commercial paper including Wakala instruments: unsecured borrowings issued by financial and non-financial entities;
- Trust certificates (including Shariah-compliant asset backed securities): asset backed securities (securities backed by receivables) with a tenor of 12 months or less issued by financial and non-financial entities;
- Other short term fixed income securities available in the market from time to time and approved by SEC.

Investment Parameters

The Fund will make investments within the investment parameters prescribed in the Trust Deed and amendments thereto, the SEC Directives issued to Unit Trust Managing Companies from time to time subject however to the restrictions and limitations set out in Rule 10 of the Unit Trust Code and amendments thereto.

The Senfin Money Market Fund will adhere to the following asset allocation parameters:

- a) The Fund will maintain a level of liquidity of 3% or more of the Net Asset Value of the Fund in cash or near cash; the term “near cash” means investments that can be easily converted to cash;
- b) An investment in a placement, IPOs or offers for sale of a listed debt instruments will not exceed 25% of the Net Asset Value of the Fund;
- c) The investment in listed debt of a listed or unlisted entity shall not exceed 25% of the Net Asset Value of the Fund;
- d) The investment in unlisted debt of a listed or unlisted entity provided the issue is guaranteed, endorsed with recourse or rated will not exceed 15% of the Net Asset Value of the Fund.

- f) Total exposure to a single entity through listed debt and unlisted debt together will not exceed 25% of the Net Asset Value of the Fund provided that (c), and (d) above is not violated;
- g) The total investment in any bank licensed by the Central Bank of Sri Lanka and carrying an investment grade rating, including investments through guarantees and endorsements will not exceed 25% of the Net Asset Value of the Fund;

The implementation of the investment policy and making any modifications thereto which does not substantially change the nature of the Fund will be the responsibility of the Fund Manager, subject to SEC approval.

Dividends

Dividends will be at the discretion of the Fund Manager. Distributions will be of varying amounts depending on the realized returns earned on investments.

Risks

- **Interest Rate Risk** – The value of interest bearing assets may fluctuate as a result of changes in interest rates.
- **Credit Risk** – The companies in which the Fund may invest may have their credit rating downgraded, fail financially or be unwilling or unable to make timely payments of interest or principal, thereby reducing the value of the Fund’s portfolio and its income.
- **Liquidity and Valuation Risk** – Certain of the Fund’s investments may be exposed to liquidity risk due to low trading volume, lack of a market maker, or legal restrictions limiting the ability of the Fund to sell particular securities at an advantageous price and/or time.

- **Currency Risks** – Fluctuation in exchange rates may affect investors who have to convert fund returns from LKR to other currencies.
- **Legal, Tax and Regulatory Risk** - Legal, tax and regulatory changes could occur during the term of the Fund that may adversely affect the Fund, its investee companies or investors. The tax laws in Sri Lanka may change, possibly with retroactive effect. Investors should review carefully this Explanatory Memorandum and consult with their tax advisers regarding the specific tax and other consequences of investing in the Fund.
- **Managed Portfolio Risk** – The Manager’s view on interest rates, the choice of investment strategies or choice of specific securities may be unsuccessful, thereby causing the Fund to not perform at optimal level or to lose money.
- **Large Investor risk** - Securities of unit trusts may be purchased and sold by “large” investors, such as institutions, funds of funds and investment portfolios. If a large investor redeems a portion or all of its investment from the Fund, some investments may have to be prematurely uplifted with penalty or require to be sold in the secondary market at prevailing rates, thus reducing the fund’s potential return. Conversely, if a large investor was to increase its investment in a fund, the fund may have to hold a relatively large position in cash for a period of time while the portfolio advisor attempts to find suitable investments. This could also negatively impact the performance of the fund and hence impact the return for other investors in the fund.

There are other circumstances (including additional risks that are not described here) which could prevent the Fund from achieving its investment objectives.
