1.0 The Fund

1.1 Introduction

The Senfin Dividend Fund is an open-ended Unit Trust that invests in a portfolio of dividend yielding shares listed on the Colombo Stock Exchange (CSE). The Fund is a contractual arrangement between the Fund Manager and the Trustee who acts on behalf of the investors. The Fund can be categorized as a growth fund since its primary objective is to achieve long term capital appreciation.

1.2 Investment Objectives

The objective of the Fund is to generate current income by investing in a portfolio of diversified dividend paying stocks and by way of capital gains. The dividends received by the Fund and the capital gains generated by the Fund will be distributed to unitholders on a semiannual basis.

1.3 Investment Strategies

The Fund aims to achieve its investment objective by investing in listed shares that have a strong history of paying dividends as well as in shares that are likely to appreciate in value over time. The Fund Manager will generally look for companies that they believe are committed to paying dividends on a consistent basis. The selection of dividend-paying stocks is the primary decision in building the investment portfolio.

The Fund's assets will be invested in listed equities under normal conditions. The Fund may invest in all categories of listed equity including voting and non-voting common shares, preference shares, right, warrants, IPOs, offers for sale and other equity related issues.

Fund Manager will also have the discretion to invest the Fund's assets in fixed income securities, subject to the guidelines stipulated by the SEC, whenever equity market returns are expected to be less attractive.

The Fund will adhere to the single entity exposure limits stipulated by the SEC from time to time.

The Fund Manager may use an Investment Committee to facilitate the investment decision-making process. A Compliance Officer will be appointed to monitor the investment activities of the Fund in order to ensure that investments in the Fund comply with the rules and regulations prescribed by the SEC.

1.6 Distribution of income & gains in the form of dividends

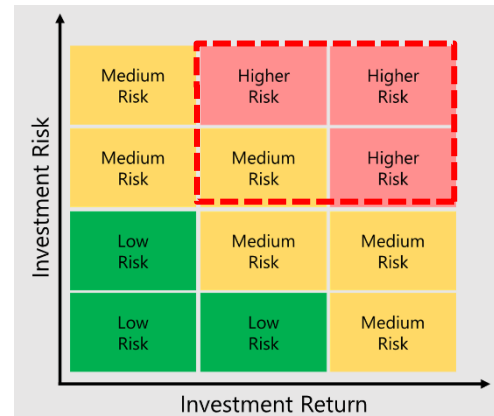

The Fund may pay dividends on a semiannual basis. Distributions in the form of dividends can be irregular and/or of varying amounts.

1.7 Primary Investment Risks & Suitable Investor Profile

Because the Fund will invest in listed equity securities, the risk profile of the Fund can be considered medium to high. With regular dividend payments offsetting capital depreciation.

Furthermore, investing in the Fund involves risks associated with making investments in equities. The value of Units or the Net Asset Value of the Fund may go down as well as up, and there can be no assurance that at the end of the Fund's term, investors will receive the amount originally invested. Accordingly, the Fund is only suitable for investment by investors who understand the risks involved in investing in shares and can tolerate share market fluctuations and in turn fluctuations in the Net Asset Value of the Fund.

Furthermore, investment in this Fund is not a bank deposit and is not insured or guaranteed by any government institution. Furthermore, since the objective of the Fund is capital appreciation, the Fund is suitable for investors who are willing and are able to remain invested in the Fund for at least 3 years.

Some of the risks that investors coming into this Fund should consider are provided below.

Equity Security Listed shares are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction and global or regional political, economic, banking and health crises. The value of equity securities in the Fund's portfolio will fluctuate and, as a result, the Fund's unit price may decline suddenly, or over a sustained period of time.

Industry Concentration The Fund's investments will be concentrated on shares that pay dividends. Therefore, the fund may not be able to benefit from capital appreciation of shares that are not invested in due to not paying regular dividends.

Dividend Yield The Fund may earn income in the form of dividends from companies that the Fund has invested in. Those companies may reduce or discontinue their dividends, thus reducing the yield of the Fund. Lower priced securities in the Fund may be more susceptible to these risks. Past dividend payments are not a guarantee of future dividend payments. Also, the market return of high dividend yield securities, in certain market conditions, may be worse than the market return of other investment strategies or the overall stock market.

Illiquid Stock Some stocks may be relatively illiquid, thereby purchasing and disposing of such shares may incur higher premiums and steeper discounts respectively.

Interest Rate Interest rate risk is the risk that fixed income prices overall, including the prices of securities held by the Fund, will decline over short or even long periods of time due to rising interest rates. Securities with longer maturities and durations tend to be more sensitive to interest rates than securities with shorter maturities.

Managed Portfolio The management's investment strategies, or choice of specific securities, may be unsuccessful and may cause the Fund to incur losses.

Frontier Markets To the extent that the Fund will be investing in a frontier market, the risk may be heightened by political changes and changes in tax or currency controls that could adversely affect the values of these investments. Frontier markets have been more volatile than the markets of developed countries with more mature economies.

Legal, Taxation and Regulatory Legal, tax and regulatory changes could occur during the term of the Fund that may adversely affect the Fund, its investee companies or investors. The tax laws in Sri Lanka may change, possibly with retroactive effect. Investors should review carefully this KIID and consult their tax advisers regarding the specific tax and other consequences of investing in the Fund.

Large Investor Securities of unit trusts may be purchased and sold by "large" investors, such as institutions, funds of funds and investment portfolios. If a large investor redeems a portion or all of its investment from a unit trust at a time when the equity markets are trending downward, some securities may have to be sold at unfavorable prices, thus reducing the fund's potential return. Conversely, if a large investor was to increase its investment in a fund, the fund may have to hold a relatively large position in cash for a period of time while the portfolio advisor attempts to find suitable investments. This could also negatively impact the performance of the fund and hence impact the return for other investors in the fund.

There are other circumstances (including additional risks that are not described here) which could prevent the Fund from achieving its investment objectives.

1.8 Fees & Expenses

Front End / Exit Fees The Fund will not charge a Front-End or Exit Fee

Administration Fee The Fund will pay an administration fee of 0.75% per annum of the Net Asset Value of the Fund to the Fund Manager for acting in that capacity. The fee will be calculated and accrued as at each Valuation Day and will be payable monthly in arrears.

Trustee Fee The Fund will pay Hatton National Bank PLC a Trustee fee of 0.15% per annum of the Net Asset Value of the Fund plus all out-of-pocket expenses authorized by the Trust Deed. The Trustee fee will be calculated and accrued as at each Valuation Day and will be payable monthly in arrears.
