### Fund Manager Comment

The Colombo Stock Exchange indices recorded an increase during Nov 2022 with ASPI\* increasing by 0.57% while the S&P SL20 Index increasing by 5.38%. The Fund's benchmark ASTRI\* also increased by 0.57% while the Fund increased by 2.31%. Negative sentiment was witnessed during first half of the month driven by uncertainty over a possible domestic debt restructuring, speculations of a delay in IMF Board level approval and QoQ decline of earnings reported by key listed corporates. However the bourse bounced back during last few sessions mainly driven by EXPO which announced possible upcoming acquisitions and due to indications of a gradual decline of interest rates. Foreign activity marginally decreased to LKR 3.8 Bn in Nov 2022 from LKR 4.0 Bn in Oct 2022. Foreigners were net sellers with a net foreign outflow of LKR 167 Mn during the month. Although the country is showing glimpse of recovery, we believe that there are further challenges in the short run such as lack of dollar liquidity, tax reforms & other fiscal consolidation measures required by IMF, challenges in debt restructuring and concerns of a global recession. However, beyond short term testing times, we look forward positively on equity in the medium run.
