1. The Fund

i. Introduction

The Senfin Insurance Sector Fund ("Fund") is an open-ended, Unit Trust that invests in Colombo Stock Exchange-listed shares that have exposure to the Insurance sector. The Fund is a contractual arrangement between the Fund Manager and the Trustee who acts on behalf of the investors. The Fund can be categorized as a growth fund since its primary objective is to achieve long term capital appreciation.

ii. Investment Objectives

The objective of the Fund is to achieve long term capital appreciation by investing in listed shares that have exposure to the Insurance Sector.

iii. Investment Strategies

The Fund's primary investment strategy will be to invest in a portfolio of listed shares that have an exposure to the Insurance sector. In the initial investment phase of the portfolio, a high proportion of the Fund will be invested in fixed income securities. Thereafter, the Manager will invest up to 97% of the portfolio's assets in listed equity securities with exposure to the Insurance sector. The Fund may invest in all categories of equity listed on the Colombo Stock Exchange, including voting and non-voting shares, preference shares, right, warrants, Initial Public Offers, offers for sale and other equity related issues.

The Manager will invest a minimum of 50% of the Fund in Insurance sector equity at all times. When equity markets are believed to be overvalued, the Manager expects to liquidate equity investments, subject to minimum 50% being invested in Insurance sector equity and utilize the proceeds of such liquidation to invest in fixed income securities as set out in the Permitted Investment section of this KIID.

The Fund will adhere to the single entity exposure limits stipulated by the SEC from time to time.

The Fund Manager may use an Investment Committee to facilitate the investment decision-making process. A Compliance Officer will be appointed to monitor the investment activities of the Fund in order to ensure that investments in the Fund comply with the rules and regulations prescribed by the SEC.

iv. Benchmark of the Fund

The Fund's benchmark will be the Insurance Sector Index of the Colombo Stock Exchange (SPCSEINP).

v. The Fund will invest in the following instruments

- Equity listed on the CSE that has exposure to the Insurance Sector; equity securities will include voting and non-voting shares, preference shares, right, warrants, Initial Public Offers, and offers for sale.
- Treasury Bills and Treasury Bonds.
- Repurchase Agreements of both Government Securities and Corporate entities.

- Corporate debt instruments including Asset Backed Securities, Commercial Papers, and Debentures;
- Money Market Unit Trust Funds approved by the SEC*.
- Income Unit Trust Funds approved by SEC*.

* In the event that the Fund invests in money market and income unit trust funds managed by Senfin Asset Management (Pvt) Ltd, the management fee applicable on own money market and income funds will be waived off so that Senfin Asset Management (Pvt) Ltd, does not charge further management fees from the investors of the Senfin Insurance Sector Fund

- (vii) Applicable unitholder register date to determine the unitholders who will be eligible for the dividend.

viii. Primary Investment Risks & Suitable Investor Profile

Potential Risk Profile of the Fund

Because the Fund will invest in listed equity securities, the risk profile of the Fund can be considered high. Furthermore, investing in the Fund involves risks associated with making investments in equities. The value of Units or the Net Asset Value of the Fund may go down as well as up, and there can be no assurance that at the end of the Fund's term, investors will receive the amount originally invested. Accordingly, the Fund is only suitable for investment by investors who understand the risks involved in investing in shares and can tolerate share market fluctuations and in turn fluctuations in the Net Asset Value of the Fund. Furthermore, investment in this Fund is not a bank deposit and is not insured or guaranteed by any government institution. Furthermore,

since the objective of the Fund is capital appreciation, the Fund is suitable for investors who are willing and are able to remain invested in the Fund for at least 3 years.

Some of the risks that investors coming into this Fund should consider are provided below.

Equity Security Risk. Listed shares are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction and global or regional political, economic, banking and health crises. The value of equity securities in the Fund's portfolio will fluctuate and, as a result, the Fund's unit price may decline suddenly, or over a sustained period of time.

Industry Concentration Risk – The Fund's investments are concentrated within one industry – the Insurance Industry. Therefore, any factors detrimental to the performance of the industry will disproportionately impact the Fund. Investments focused in a particular industry are subject to greater risk and are more greatly impacted by market volatility than less concentrated investments.

Dividend Yield Risk. The Fund may earn income in the form of dividends from companies that the Fund has invested in. Those companies may reduce or discontinue their dividends, thus reducing the yield of the Fund. Lower priced securities in the Fund may be more susceptible to these risks. Past dividend payments are not a guarantee of future dividend payments. Also, the market return of high dividend yield securities, in certain market conditions, may be worse than the market return of other investment strategies or the overall stock market.

Illiquid Stock Risk. Some stocks may be relatively illiquid, thereby purchasing and disposing of such shares may incur higher premiums and steeper discounts respectively.

Interest Rate Risk. Interest rate risk is the risk that fixed income prices overall, including the prices of securities held by the Fund, will decline over short or even long periods of time due to rising interest rates. Securities with longer maturities and durations tend to be more sensitive to interest rates than securities with shorter maturities.

Managed Portfolio Risk – The management's investment strategies, or choice of specific securities, may be unsuccessful and may cause the Fund to incur losses.

Frontier Markets Risk – To the extent that the Fund will be investing in a frontier market, the risk may be heightened by political changes and changes in tax or currency controls that could adversely affect the values of these investments. Frontier markets have been more volatile than the markets of developed countries with more mature economies.

Legal, Taxation and Regulatory Risk - Legal, tax and regulatory changes could occur during the term of the Fund that may adversely affect the Fund, its investee companies or investors. The tax laws in Sri Lanka may change, possibly with retroactive effect. Investors should review carefully this KIID and consult their tax advisers regarding the specific tax and other consequences of investing in the Fund.

Large Investor Risk - Securities of unit trusts may be purchased and sold by "large" investors, such as institutions, funds of funds and investment portfolios. If a large investor redeems a portion or all of its investment from a unit trust at a time when the equity markets are trending downward, some securities may have to be sold at unfavorable prices, thus reducing the fund's potential return. Conversely, if a large investor was to increase its investment in a fund, the fund may have to hold a relatively large position in cash for a period of time while the portfolio advisor attempts to find suitable investments. This could also negatively impact the performance of the fund and hence impact the return for other investors in the fund.

There are other circumstances (including additional risks that are not described here) which could prevent the Fund from achieving its investment objectives.

ix. Fees & Expenses

Front-end Fee

- The Fund will not charge a Front-End fee.

Administration Fee

- The Fund will pay an administration fee of 0.75% per annum of the Net Asset Value of the Fund to the Fund Manager for acting in that capacity. The fee will be calculated and accrued as at each Valuation Day and will be payable monthly in arrears.
