## FUND MANAGER'S REPORT

Dear Investor,

We are pleased to present the semi-annual report Senfin Financial Services Fund for the period ending 30 June 2024. The fund was launched on 5<sup>th</sup> Dec 2023.

The performance of the equity market as measured by the All-Share Price Index (ASPI) increased by 13.99% during the first half of 2024 vs an increase of 11.23% in the first half of 2023. During the initial part of the 6 months, indices displayed a positive momentum due to the sharp drop in fixed income yields possibly shifting some fund inflows to equity from fixed income, better than anticipated quarterly earnings releases, above average dividend declarations by key listed corporates, positive expectations on External Debt Restructuring and largely improved macro-economic fundamentals. However, during the latter part of 1H2024, indices witnessed some weakness mainly due to major rights issues announced dragging the bourse low, profit taking and uncertainty over the upcoming elections. Meanwhile the fund's benchmark recorded an increase of 16.61% during the same period. (*The benchmark for this fund is the aggregate market cap-based index of Banking Sector & Diversified Financials Sector*)

During the period from the fund launch to 30 Jun 2024, ASPI recorded an increase of 13.50% while the fund's benchmark recorded an increase of 14.31%.

During 1H2024, the Monetary Board of the Central Bank of Sri Lanka (CBSL) held 3 policy meetings. During the 1st Monetary Policy Review, the CBSL decided to maintain the Standing Deposit Facility Rate (SDFR) and the Standing Lending Facility Rate (SLFR) at the same level of 9.00% and 10.00% respectively. However, during the 2nd Monetary Policy Review in March 2024, the CBSL decided to reduce the SDFR and SLFR by 50 bps to 8.50% and 9.50% respectively, while keeping the SRR unchanged at 2.00%, mainly to maintain inflation at the desired level of 5% or below and to enable economic growth to reach its potential. Following that, during the 3rd Monetary Policy Review in May 2024, policy rates were maintained at same levels.

1H2024 saw Treasury bill yields gradually easing. The benchmark 03, 06 and 12-month yields decreased from 14.51%, 14.16% and 12.93% respectively as at the end of December 2023 to 8.62%, 9.04% and 9.18% respectively as at the end of May 2024. Thereafter, the yields were seen moving up throughout the month of June 2024 and closed at 10.07%, 10.19% and 10.31% respectively as at 30 June 2024. During the 6 month period, the yield curve witnessed a correction and switched to a more upward sloping yield curve with the 3M and 6M yields dropping below 12M yield. Yields on long term government bonds too eased gradually, but remained volatile across the medium to long term maturities.

Inflation measured by the year-on-year change in the Colombo Consumer Price Index (CCPI) accelerated to 6.4% in Jan 2024 from 4.0% in Dec 2023, mainly due to tax adjustments implemented at the beginning of the month and weather-related disruptions to food supply. Similarly, inflation measured by the year-on-year change in the National Consumer Price Index (NCPI) too increased to 6.5% in Jan 2024 from 4.2% in Dec 2023. However, during subsequent months, inflation witnessed a decline and during March – June 2024 months, it remained well below the targeted of 5.0% level. Notable slowdown of Food Inflation was witnessed during the subject period while the decline of Non-Food Inflation was mainly driven by the drop in prices of fuel, gas etc. In addition, the higher base effect coming from the previous year assisted the overall slowdown of inflation.

The exchange rate experienced a gradual appreciation during Jan-Apr 2024, driven by several positive factors including increase in worker remittances, rise in tourism earnings and improvement in the country's Gross Official Reserves. However, the exchange rate recorded a slight depreciation during May-Jun 2024.

Sri Lanka reached External Debt Restructuring (EDR) agreement by the end of the 1H2024 with the Official Creditor Committee and Export-Import Bank of China. The agreement resulted in a maturity extension, principal moratorium and a coupon reduction. We expect interest rates to bottom out in upcoming months and slightly increase closer to the end of CY2024. Considering largely improved macroeconomic fundamentals including positive developments in EDR front, we continue to remain bullish on equities in the medium term. We continue to analyze and invest in counters that are expected to perform well in the medium / long run, while remaining committed to the overall aim of long term capital appreciation and income generation.

Sincerely,

#### **Investment Team**
